

Cloudya

Seamless CRM integration

Hello there.

Hello everywhere.

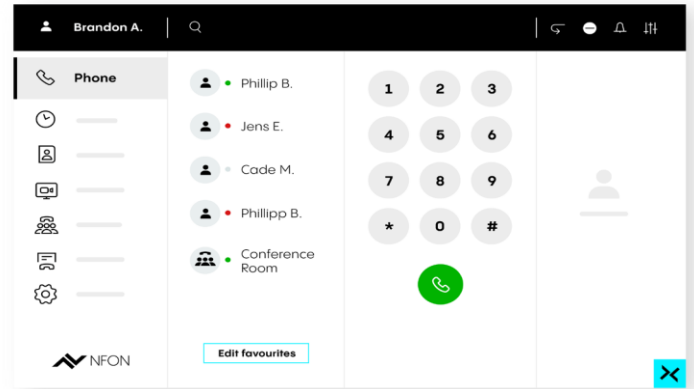

Employees use an average of 35 job-necessary apps, switching more than 1,100 times every day. Cloudya Integration for Microsoft Teams* seamlessly joins up PSTN voice calling and PBX features with this popular platform. The days of juggling apps are over.

One destination. Many ways to go.

Looking for uncomplicated PSTN Connection? Look no further. This is your self-serve off-the-shelf solution. Call mobiles or landlines straight from Microsoft Teams* and arrange numbers for your whole team direct from the Microsoft Teams* admin centre. A hassle-free solution, it's easy to set-up in a couple of ticks with just a few clicks.

Discover the main benefits.

Integration for Microsoft Teams was made for businesses that aim for flexible and remote working. Allowing employees to quickly connect, communicate and collaborate across their teams whether they are on the move, in the office or at home.

Cloudya Premium Integration with Microsoft Teams*

Need a feature-rich Enterprise PBX with call queuing, IVR, contact centre and more? Then, boy, do we have a treat for you. Our Cloudya Premium Integration is game changing for companies that want to dial Microsoft Teams*.

- Multiple DDIs for phone extension or services within the same PBX
- Source based call forwarding with up to 10 profiles
- Voicemail access from any phone by dialling the star code
- Call-Pull to flexibly swap calls in progress between devices
- Connect Cloudya with analogue devices including fax, phone and DECT systems
- Caller ID restriction for privacy and enduser number protection
- Professional switchboard to transfer calls
- Possibility of adding an intercom feature
- And much more
